

Texas Two Step

RicoRock INC.
better waterfalls, by design

A compact version of this waterfall is created by not using back boulders 3 & 4 so the waterfall is 36 inches deep.

8 Cast pieces & natural cobbles colored (Fieldstone shown here)
2 inch pvc plumbing snorkel included in kit, not shown here. Touch-up kit with stains included with kit.

9 feet wide, 5 ft deep, 26 in. high

Install base pieces with 1-2 inch mortar and other rocks with one inch mortar. Fill joints to eliminate seepage. After mortar has set rake joints 1/2 inch. Natural cobbles can be set with construction adhesive for a cleaner look.

2 inch pvc comes from bottom of ledge #7 and connection to pool return goes between two back boulders. Pipe can be hidden with natural cobbles or diverter rocks sent as part of kit.

Kit weighs 1,200 lbs, heaviest piece about 200 lbs.
