Jumper Rocks

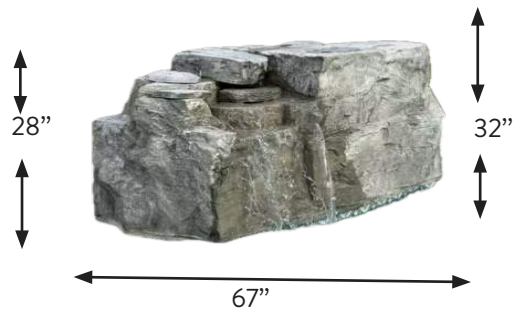

Updated August 2026

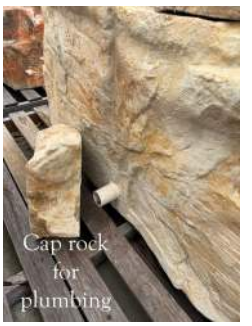

Any rock used as a jump platform should be installed to meet pool codes that require 6 feet of water depth or more and never used for head first diving.

Jumper Plus

The Jumper Plus features a small cascade on one side, shown here with optional boulder. The 2 inch return pipe is hidden with small flat rock, included, and plumbing in backside is
hidden with small hollow rock. The Texas version uses an access panel for plumbing on the interior cavity.
Weight 450lbs.

LO2

A short version of the Jumper Plus, no waterfall, features small ledge steps to climb to the top platform.
62” L x 30” x 24” H

TS7, TS8 Jump Rocks, stacked
